

## WMI HAND SANITIZER With 75% Alcohol

Our WMI Hand Sanitizer is an alcohol based sanitizer made to the formula recommended by both the World Health Organization (WHO) and the FDA. It contains no gels or scenting agents to inhibit its effectiveness. The sanitizer has a distinct alcohol odor which disappears in 10-15 seconds as the product evaporates, leaving behind no lingering smell. It also contains a small amount of glycerin which acts as a moisturizer to keep from drying the skin.

Using WMI hand sanitizer promotes hand hygiene throughout your facility wherever soap and water aren't available. The sanitizer clings to the hand and is easy to spread, ensuring full coverage and a smooth end user experience.

- Dye-free • Fragrance-free

### The choice is yours

WMI Hand Sanitizer is sold both with and without hand pumps for maximum flexibility. The 1/2 Gallon bottle is suitable for use with a simple hand pump or can be used to refill existing counter and wall dispensers. Refill packages are also an attractive option for cost conscious customers who wish to reuse their hand pumps. You can also purchase No Touch dispensers from WMI which run on batteries and can be placed virtually anywhere. Their No Touch operation ensure maximum user protection. Our half gallon bottle weighs less than 4lbs full for easy handling but is also stable enough to use directly on counter top with a hand pump. Each bottle has a tamper proof heat seal to ensure its integrity.

| Catalog # | DESCRIPTION                           | PRICE    |
